

Premium protection. Premium returns. **Pick your term.**

AG ROP Select-a-TermSM — is a remarkable product that combines return of premium cash value¹ with the ability to offer the exact length of coverage needed. Your clients are protected by the policy's death benefit in the event of the insured's death during the level term period. If the insured survives and maintains the policy to the end of the level-term period, the base cumulative premium paid will be returned in a lump sum that is free of income tax² under current tax law. Your client can choose the period of time for protection — 15 years or any of 20 through 35 years³ — depending on issue age and tobacco use. It's that simple and that powerful.

- AG ROP Select-a-Term accumulates a cash value that starts no later than the fifth policy year. At the end of the level term period, the cash value of the in-force policy provides an endowment benefit equal to the total of cumulative premiums paid, less any charges for substandard ratings and riders and any outstanding loan balance. If needs change and your client surrenders the policy, or converts to our permanent insurance, they will receive the cash value that has built up in relation to the age of the policy, minus any outstanding loan balance.
- Policy owners should consult a tax professional to determine if transaction is a taxable event.
- AG ROP Select-a-Term 31 – 35 periods are not available in the state of Washington.
- The amount of paid-up life insurance plus a reduced endowment is based on how much the cash value will buy when applied as a net single premium at the insured's age on the date of default.
- See the riders for complete details. There may be a charge for each rider selected. Adding or deleting riders and increasing or decreasing coverage under existing riders can have tax consequences. Policy owners should consult a qualified tax advisor.
