

Life Insurance Approved by Women!

Most women don't particularly like life insurance because they consider it to be "death" insurance.

But they **DO** like Life Insurance that insures "quality of life!" It's life insurance you don't have to die to use!

In addition to addressing men's needs as the protector and provider with a life insurance benefit, it addresses women's needs for a plan in case someone gets seriously ill. One product does it all for no extra charge.

Imagine a young mother who gets 75% of her life insurance benefit (tax free) after being diagnosed with invasive cancer.* This money allows her to afford top quality medical treatment and take care of her family in ways she would never think possible.

It can provide hundreds of thousands of tax free dollars in case of cancer, heart attack, stroke, Lou Gehrig's Disease, kidney failure, or blindness.

(*Amounts available depend on each situation. We can explain how it works.)

Is your Life Insurance just "death insurance"
